⇒

① Graph directed হবে।

② Graph এ কোন cycle থাকবে না।

u → v

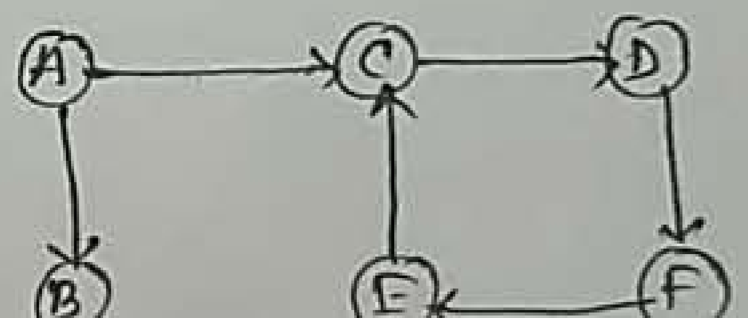
③ Topological sort of a directed graph is a linear ordering of its vertices such that every directed edge UV from vertices U to V, where U comes before V.

Method:

① প্রতিটির vertices এর indegree (no of incoming edge) বের করতে হবে।

② ...tices print করতে হবে, যার indegree = 0.

Print:



(ii) Graph এ কোন cycle থাকবে না।

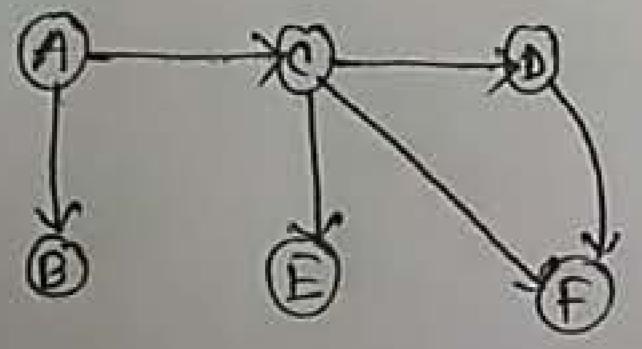
(iii) Topological sort of a directed graph is a linear ordering of its vertices such that every directed edge UV from vertices U to V, where U comes before V.

Method:

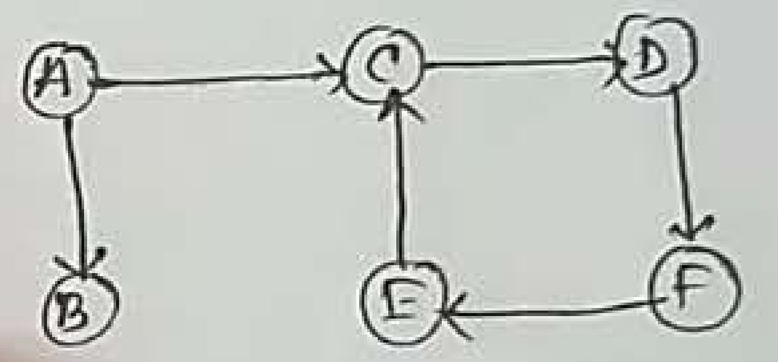
(i) প্রতিটি vertices এর indegree (no of incoming edge) বের করতে হবে।

(ii) ঐ vertices print করতে হবে, যার indegree = 0.

Print:



Print:



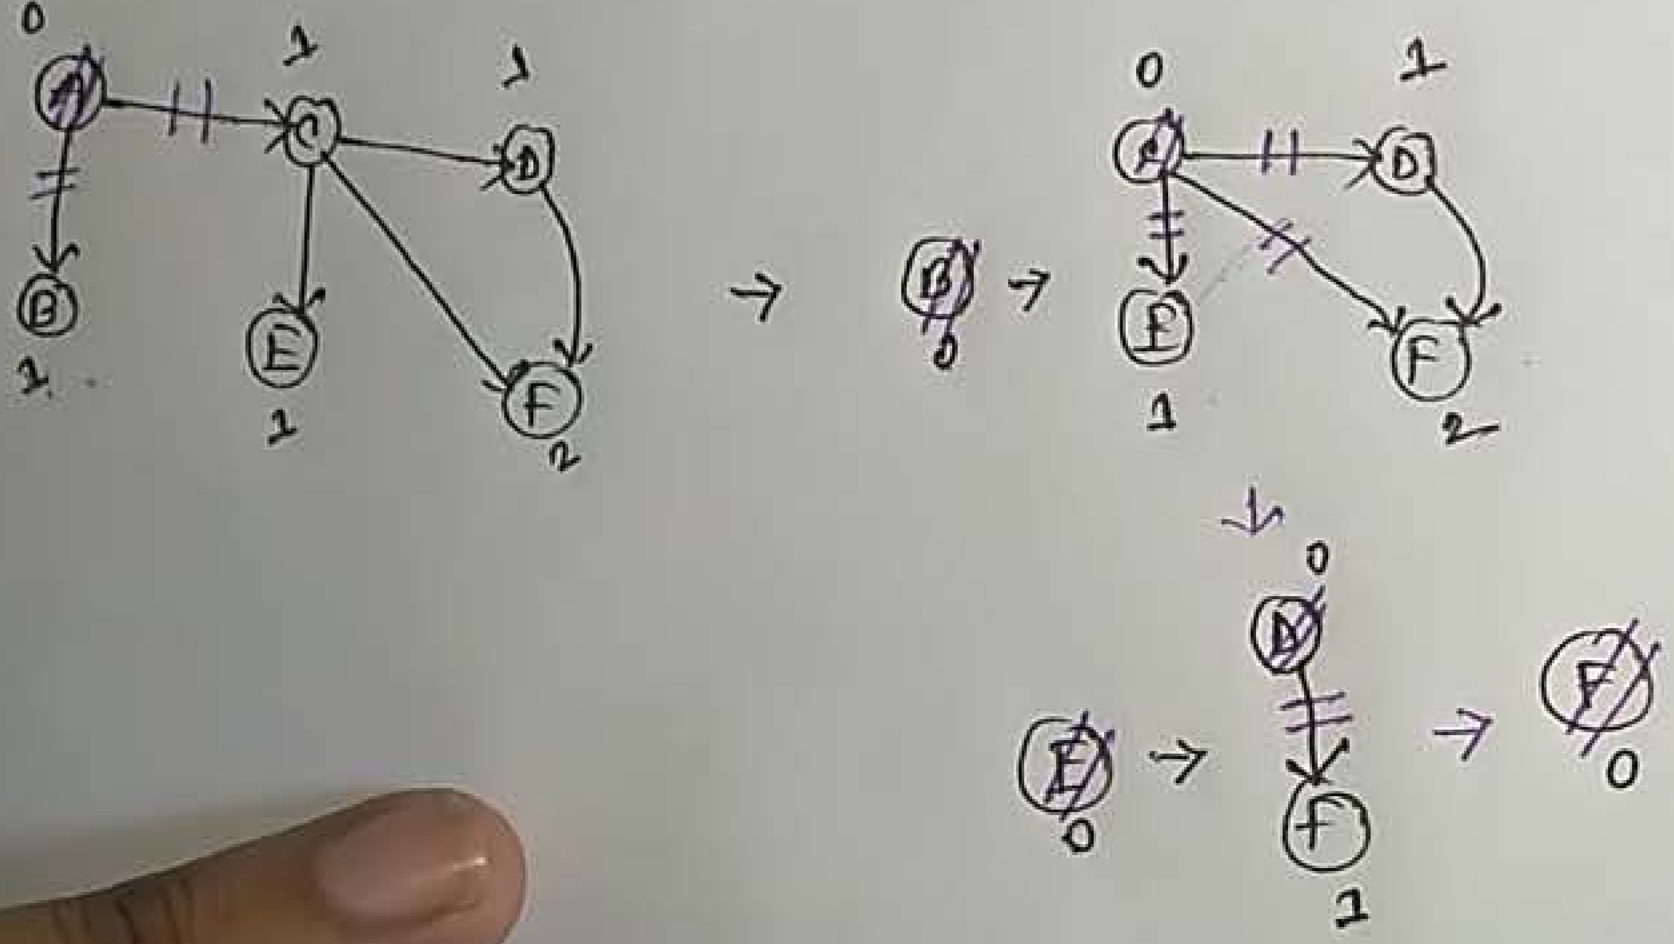
Topological sort of a directed graph is a linear ordering of its vertices such that every directed edge UV from vertices U to V, where U comes before V.

Method:

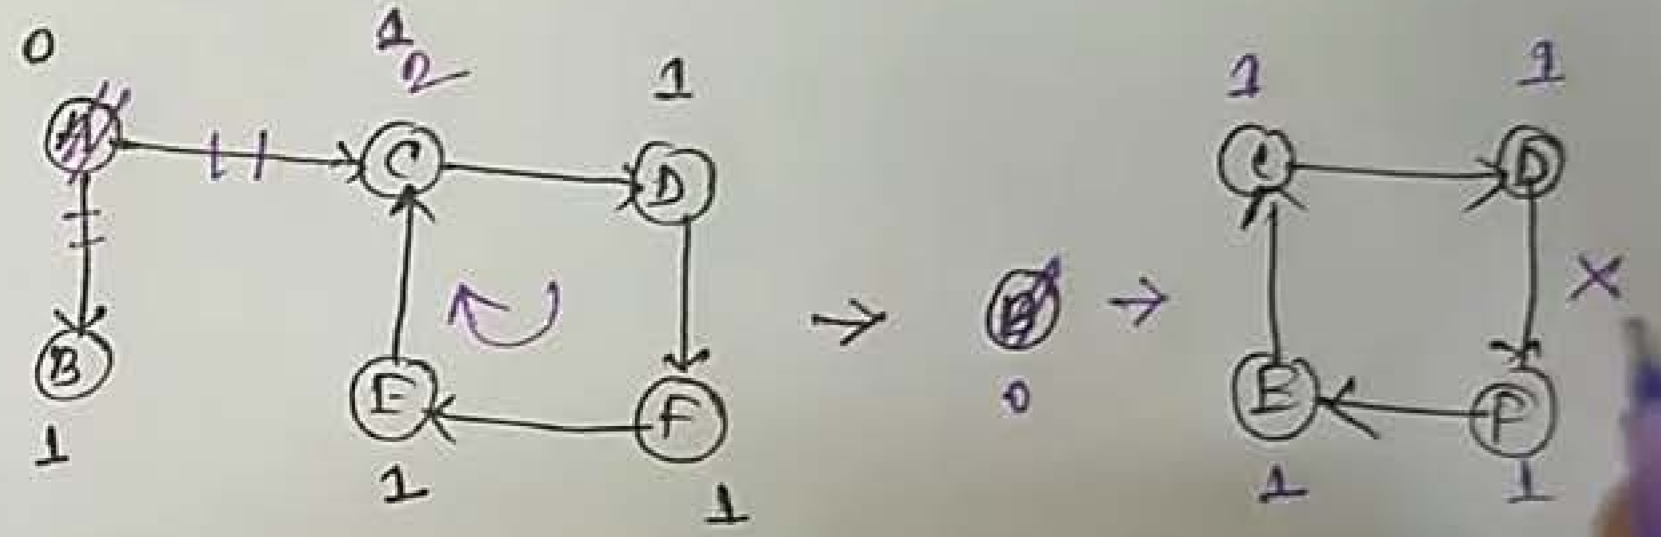
(i) প্রতিটির vertices এর indegree (no of incoming edge) বের করতে হবে।

(ii) 0 vertices print করতে হবে, যার indegree = 0.

Print: A B C E D F



Print: A B



Because of cycle, there is no in-degree=0 and hence topological sorting is not possible for cycle
