

Binary Search Tree Deletion

Made with KINEMASTER

B.Sc. in CSE, UAP

fazhanhossan246@gmail.com

① Leaf node সরাসরি delete করা যায়; এতে অন্য tree পরিবর্তন হয় না।

② $\Rightarrow$ Root এর left side থেকে value replace করতে হবে Maximum value নিতে হবে।

$\Rightarrow$ Root এর Right side থেকে value replace করতে হবে Minimum value নিতে হবে।

Example: 1

Example: 2

① Leaf node ~~মহত্ব~~ delete করা যায়; এর জন্য
- tree পরিবর্তন হয় না।

Made with KINEMASTER

② $\Rightarrow$ Root এর left side ~~হয়~~ value replace করতে হবে ~~হবে~~ Maximum value নিতে
 $\Rightarrow$ Root এর Right side ~~হয়~~ value replace করতে হবে ~~হবে~~ Minimum value নিতে

Example: 1

Example: 2

① Leaf node ~~ଅଟ(5)ର~~ delete କରା ଯାଏ; ଏହା ତା'ର
tree ପରିଚାଳନା କରା ଯାଏ।

② $\Rightarrow$ Root ଏବଂ left side ଉପରେ value replace କରାଯିବ ଯେଉଁ Maximum value ଥିବ
 $\Rightarrow$ Root ଏବଂ Right side ଉପରେ value replace କରାଯିବ ଯେଉଁ Minimum value ଥିବ

Example: 1

Example: 2

-Tree traversal 22 211

- ① ⇒ Root or left side tree value replace kare hain Maximum value 12/9
 ⇒ Root or Right side tree value replace kare hain Minimum value 12/9

Example: 1

Example: 2

ଅବିଚଳିତ ହେବ।

Root ଏବଂ left side ଥିବା Value replace କରାଯିବ ଏହା Maximum value ନିକଟେ ହେବ।

Root ଏବଂ Right side ଥିବା Value replace କରାଯିବ ଏହା Minimum value ନିକଟେ ହେବ।

Example: 2

Root or left side ke value replace krke root krni hai.

Root or Right side ke value replace krke right ke minimum value replace krni hai.

Made with KINEMASTER

Example: 2
